endoSee®
office hysteroscopy

Introducing EndoSee— a truly innovative way to perform in-office, diagnostic hysteroscopy in any room, at any site

An all-in-one, handheld, portable, cordless system for diagnostic hysteroscopy

Simple and quick to set up, requiring minimal staff training

System includes a low-cost, reusable handset and an affordable, single-use cannula

Comes with dock for battery charge and data transfer via USB
(rechargeable battery lasts at least 2 hours)
